

Requirements Traceability Matrix (RTM)

Project: MoFlow: Smart Recurring Bill Payments Platform

Document Type: Requirements Traceability Matrix (RTM)

Role: Business Analyst

Version: 1.0

Date: July 2026

1. Introduction

Purpose

The Requirements Traceability Matrix (RTM) provides end-to-end traceability of business requirements throughout the software development lifecycle. It ensures that every business requirement is translated into functional requirements, implemented through user stories, validated by acceptance criteria, and verified during testing.

The RTM helps stakeholders ensure that:

- All business requirements are addressed.
- No requirements are overlooked during development.
- Every feature can be traced from business need to implementation and testing.
- Change impacts can be assessed efficiently.

2. Traceability Matrix

Business Requirement	Functional Requirement	Business Rule	User Story	Acceptance Criteria	Test Case
BR-001 User registration	FR-001 User Registration	BR-001	US-001	AC-001	TC-001
BR-002 User authentication	FR-002 Login	BR-004	US-002	AC-002	TC-002
BR-003 Password recovery	FR-003 Password Recovery	BR-004	US-003	AC-003	TC-003

BR-004 Profile management	FR-004 User Profile	BR-026	US-004	AC-004	TC-004
BR-005 Notification preferences	FR-005 Notification Preferences	BR-024	US-024	AC-024	TC-024
BR-006 Link mobile money account	FR-006 Link Mobile Money Account	BR-006	US-005	AC-005	TC-005
BR-007 Verify linked account	FR-007 Verify Linked Account	BR-007	US-005	AC-005	TC-006
BR-008 Manage linked accounts	FR-008 Manage Linked Accounts	BR-008	US-006	AC-006	TC-007
BR-009 Create recurring payment	FR-009 Create Recurring Payment	BR-009	US-007	AC-007	TC-008
BR-010 Select payment frequency	FR-010 Select Payment Frequency	BR-011	US-008	AC-008	TC-009
BR-011 Select start date	FR-011 Select Start Date	BR-010	US-007	AC-007	TC-010
BR-012 Select end date	FR-012 Select End Date	BR-010	US-007	AC-007	TC-011
BR-013 Edit payment schedule	FR-013 Edit Payment Schedule	BR-012	US-009	AC-009	TC-012
BR-014 Pause payment schedule	FR-014 Pause Payment Schedule	BR-015	US-010	AC-010	TC-013
BR-015 Resume payment schedule	FR-015 Resume Payment Schedule	BR-015	US-011	AC-011	TC-014
BR-016 Cancel payment schedule	FR-016 Cancel Payment Schedule	BR-014	US-012	AC-012	TC-015
BR-017 Automatic payment execution	FR-017 Automatic Payment Execution	BR-018	US-013	AC-013	TC-016
BR-018 Validate payment	FR-018 Payment Validation	BR-016	US-013	AC-013	TC-017
BR-019 Payment status	FR-019 Payment Status	BR-036	US-013	AC-013	TC-018
BR-020 Failed payment handling	FR-020 Failed Payment Handling	BR-019	US-015	AC-015	TC-019

BR-021 Retry failed payment	FR-021 Payment Retry	BR-021	US-016	AC-016	TC-0 20
BR-022 Payment reminders	FR-022 Upcoming Payment Reminder	BR-023	US-023	AC-023	TC-0 21
BR-023 Successful payment notification	FR-023 Successful Payment Notification	BR-020	US-014	AC-014	TC-0 22
BR-024 Failed payment notification	FR-024 Failed Payment Notification	BR-021	US-015	AC-015	TC-0 23
BR-025 Schedule modification notification	FR-025 Schedule Modification Notification	BR-024	US-024	AC-024	TC-0 24
BR-026 Dashboard overview	FR-026 Dashboard Overview	BR-038	US-017	AC-017	TC-0 25
BR-027 Upcoming payments	FR-027 Upcoming Payments	BR-038	US-018	AC-018	TC-0 26
BR-028 Recent transactions	FR-028 Recent Transactions	BR-038	US-017	AC-017	TC-0 27
BR-029 Spending summary	FR-029 Spending Summary	BR-038	US-031	AC-031	TC-0 28
BR-030 Payment history	FR-030 Payment History	BR-022	US-019	AC-019	TC-0 29
BR-031 Payment details	FR-031 Payment Details	BR-022	US-019	AC-019	TC-0 30
BR-032 Search payment history	FR-032 Search Payment History	BR-039	US-020	AC-020	TC-0 31
BR-033 Filter payment history	FR-033 Filter Payment History	BR-039	US-021	AC-021	TC-0 32
BR-034 Download receipt	FR-034 Download Receipt	BR-037	US-022	AC-022	TC-0 33
BR-035 Session timeout	FR-035 Session Timeout	BR-031	US-027	AC-027	TC-0 34
BR-036 Multi-factor authentication	FR-036 Multi-Factor Authentication	BR-032	US-026	AC-026	TC-0 35

BR-037 User management	FR-037 User Management	BR-028	US-028	AC-028	TC-036
BR-038 System monitoring	FR-038 System Monitoring	BR-029	US-029	AC-029	TC-037
BR-039 Audit logs	FR-039 Audit Logs	BR-029	US-029	AC-029	TC-038
BR-040 Reporting	FR-040 Reporting	BR-030	US-030	AC-030	TC-039

3. Traceability Legend

Prefix	Meaning
BR	Business Requirement
FR	Functional Requirement
NFR	Non-Functional Requirement
US	User Story
AC	Acceptance Criteria
TC	Test Case

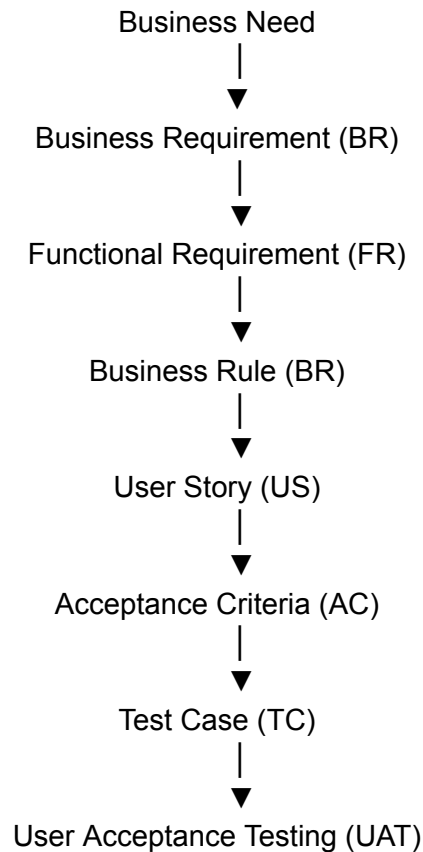

4. Benefits of the RTM

The Requirements Traceability Matrix enables the project team to:

- Ensure every business requirement is implemented.
- Verify that all requirements are covered by user stories and acceptance criteria.
- Support impact analysis when requirements change.
- Improve communication between business, product, engineering, and QA teams.
- Provide complete traceability throughout the software development lifecycle.
- Reduce the risk of missing or incomplete functionality.

5. Traceability Process

The MoFlow project follows this traceability workflow:

6. Maintenance Guidelines

The RTM should be updated whenever:

- New requirements are introduced.
- Existing requirements are modified.
- User stories are added or removed.
- Acceptance criteria change.
- Additional test cases are created.
- Project scope is revised.

Maintaining the RTM throughout the project lifecycle helps preserve alignment between business objectives and delivered functionality.

7. Conclusion

The Requirements Traceability Matrix provides a structured framework for tracking MoFlow requirements from business objectives through implementation and validation. By linking

business requirements to functional requirements, business rules, user stories, acceptance criteria, and test cases, the RTM supports effective change management, improves project transparency, and helps ensure that the delivered solution meets stakeholder expectations.
