

Success Metrics (KPIs)

Project: MoFlow: Smart Recurring Bill Payments Platform

Role: Business Analyst

Version: 1.0

Date: July 2026

Introduction

This document defines the Key Performance Indicators (KPIs) and success metrics that will be used to evaluate the performance of the MoFlow Smart Recurring Bill Payments Platform after implementation.

The success metrics align with the business objectives established during the product discovery phase and provide a structured approach for measuring user adoption, business performance, customer satisfaction, operational efficiency, and product reliability.

These metrics enable stakeholders to assess whether the product is delivering its intended business value, identify areas requiring improvement, and support data-driven decision-making throughout the product lifecycle.

Purpose

The objectives of this document are to:

- Define measurable indicators for evaluating product success.
- Align KPIs with the project's business objectives.
- Establish target values for each KPI.
- Provide a reporting framework for ongoing product monitoring.
- Support continuous improvement through evidence-based decision-making.

KPI Framework

To provide a balanced view of product performance, MoFlow's KPIs are grouped into five categories.

Business Performance KPIs

These metrics evaluate whether the platform is achieving its strategic business goals.

- Recurring Payment Adoption Rate
- Monthly Transaction Volume
- Customer Retention Rate
- Revenue Growth (where applicable)
- Active Recurring Payment Schedules

3.2 Product Performance KPIs

These metrics measure user engagement and feature adoption.

- Monthly Active Users (MAU)
- Daily Active Users (DAU)
- Feature Adoption Rate
- Payment Schedule Creation Rate
- Dashboard Engagement Rate

3.3 Customer Experience KPIs

These metrics evaluate customer satisfaction and loyalty.

- Customer Satisfaction Score (CSAT)
- Net Promoter Score (NPS)
- User Retention Rate
- User Feedback Rating
- Customer Complaint Rate

3.4 Operational KPIs

These metrics measure operational efficiency and service reliability.

- Payment Success Rate
- Failed Payment Rate
- Missed Payment Rate
- Average Issue Resolution Time
- Payment Processing Time

3.5 Technical Quality KPIs

These metrics monitor platform stability and reliability.

- System Availability (Uptime)
- API Success Rate
- Application Error Rate
- Average Response Time
- Critical Incident Count

4. KPI Register

KPI	Description	Measurement	Target	Reporting Frequency	Owner
Recurring Payment Adoption Rate	Percentage of active users utilizing recurring payments	Users with recurring schedules / Active Users	>= 35%	Monthly	Product Manager
Monthly Active Users (MAU)	Number of unique active users each month	Active Users	+20% annual growth	Monthly	Product Manager
Active Recurring Payment Schedules	Total active recurring payment schedules	Count	Continuous growth	Monthly	Product Team
Payment Success Rate	Percentage of successful recurring payments	Successful Payments / Total Payments	>= 98%	Daily	Engineering Team
Failed Payment Rate	Percentage of unsuccessful recurring payments	Failed Payments / Total Payments	<= 2%	Daily	Engineering Team
Missed Payment Rate	Percentage of scheduled payments not completed	Missed Payments / Scheduled Payments	<= 5%	Monthly	Product Team
Customer Satisfaction (CSAT)	Customer satisfaction score	Survey Results	>= 4.5 / 5	Quarterly	Customer Success

Net Promoter Score (NPS)	Customer willingness to recommend the product	NPS Survey	≥ 50	Quarterly	Customer Success
Customer Retention Rate	Percentage of returning users	Returning Users $\div$ Total Users	$\geq 85\%$	Monthly	Product Manager
Payment Reminder Engagement Rate	Percentage of reminders opened or acknowledged	Reminder Engagement	$\geq 70\%$	Monthly	Product Team
Customer Support Tickets	Number of payment-related support requests	Ticket Count	-25%	Monthly	Customer Support
Average Resolution Time	Average time taken to resolve support issues	Hours	< 24 Hours	Monthly	Customer Support
Platform Availability	Percentage of system uptime	Uptime Monitoring	$\geq 99.9\%$	Monthly	DevOps Team
API Success Rate	Successful API requests	Successful Requests $\div$ Total Requests	$\geq 99\%$	Weekly	Engineering Team
Average Payment Processing Time	Average time required to complete payments	Seconds	< 5 Seconds	Weekly	Engineering Team

KPI Alignment with Business Objectives

The following table demonstrates how each KPI supports the project's business objectives.

Business Objective	Supporting KPI(s)
Reduce missed recurring payments	Missed Payment Rate, Payment Success Rate
Increase recurring payment adoption	Recurring Payment Adoption Rate, Active Recurring Payment Schedules

Improve customer satisfaction	CSAT, NPS, Customer Complaint Rate
Increase customer retention	Customer Retention Rate, MAU
Improve operational efficiency	Average Resolution Time, Support Tickets
Improve payment reliability	Payment Success Rate, Failed Payment Rate
Increase platform engagement	Dashboard Engagement Rate, Reminder Engagement Rate

Reporting Framework

To ensure continuous monitoring and informed decision-making, KPI reports will be produced at different intervals depending on the nature of the metric.

Report	Frequency	Audience	Purpose
Operational Performance Dashboard	Daily	Operations & Engineering	Monitor system performance and payment reliability
Product Performance Dashboard	Weekly	Product Team	Track user engagement and feature adoption
Business Performance Report	Monthly	Product Manager & Business Stakeholders	Evaluate progress toward business objectives
Customer Experience Report	Quarterly	Leadership Team	Review customer satisfaction and retention
Executive KPI Summary	Quarterly	Executive Stakeholders	Assess strategic performance and business impact

Performance Thresholds and Decision Triggers

Performance thresholds help identify when corrective action is required.

KPI	Threshold	Recommended Action
Payment Success Rate	<98%	Investigate failed transactions and prioritize technical fixes.

Failed Payment Rate	>2%	Review payment gateway performance and system logs.
Missed Payment Rate	>5%	Assess reminder effectiveness and scheduling workflows.
Customer Satisfaction	<4.0/5	Conduct user research and identify pain points.
Net Promoter Score	<40	Review customer feedback and improve user experience.
Customer Retention Rate	<80%	Analyse churn drivers and improve engagement strategies.
Support Tickets	Increase >20% month-over-month	Investigate recurring issues and improve product usability.
Platform Availability	<99.9%	Review infrastructure resilience and incident management processes.

Dashboard Requirements

The executive dashboard should provide stakeholders with a real-time overview of product performance through visual KPI summaries.

The dashboard should include:

- Monthly Active Users
- Active Recurring Payment Schedules
- Payment Success Rate
- Failed Payment Rate
- Missed Payment Rate
- Customer Satisfaction Score
- Net Promoter Score
- Customer Retention Rate
- Platform Availability
- Payment Reminder Engagement
- Support Ticket Volume
- Monthly Transaction Volume

The dashboard should support filtering by reporting period, customer segment, payment type, and geographic location where applicable.

Data Sources

The following data sources will support KPI reporting.

Data Source	Metrics Supported
Application Database	Users, payment schedules, transaction history
Payment Gateway	Payment success and failure metrics
Customer Support System	Support tickets and resolution time
User Feedback Surveys	CSAT and NPS
System Monitoring Platform	Uptime, API performance, response time
Product Analytics Platform	User engagement and feature adoption

Assumptions

This KPI framework assumes:

- Reliable access to transactional and operational data.
- Integration with payment service providers and analytics tools.
- Consistent data quality and governance practices.
- Availability of customer feedback mechanisms.
- Appropriate monitoring tools for system performance.

These assumptions are made for the purposes of this portfolio case study and do not represent any specific organization's production environment.

Conclusion

The Success Metrics framework provides a structured approach for evaluating whether MoFlow delivers meaningful value to its users and achieves its intended business outcomes. By aligning measurable KPIs with strategic objectives, stakeholders can monitor product performance, identify emerging risks, and make informed decisions based on reliable data.

The KPIs defined in this document establish clear success criteria for the project and provide an ongoing mechanism for assessing user adoption, operational performance, customer satisfaction, and business growth. These metrics will serve as an essential component of continuous product improvement throughout the lifecycle of MoFlow.
