

# Business Objectives

**Project:** MoFlow - Smart Recurring Bill Payments Platform

**Role:** Business Analyst

**Version:** 1.0

**Date:** July 2026

## Introduction

This document defines the business objectives for the MoFlow Smart Recurring Bill Payments Platform. It outlines the strategic and operational outcomes the product aims to achieve, ensuring that all stakeholders have a shared understanding of the value the solution is expected to deliver.

The objectives presented in this document are derived from the business problem identified during the discovery phase and will guide decision-making throughout requirements elicitation, solution design, product development, testing, and post-launch evaluation.

These objectives also provide a foundation for prioritizing requirements, measuring project success, and aligning product features with business strategy.

## Business Goal

The primary business goal of MoFlow is to improve the management of recurring financial obligations by providing a secure, intuitive, and automated digital payment platform that enhances the user experience while supporting sustainable business growth through increased recurring digital transactions.

## Strategic Objectives

To achieve the overall business goal, MoFlow will pursue the following strategic objectives:

- Increase the adoption of recurring digital payment services.
- Improve payment reliability through automation.
- Enhance customer satisfaction by reducing payment-related challenges.
- Strengthen customer retention through an improved payment experience.
- Increase recurring transaction volumes across the platform.
- Improve operational efficiency by reducing manual payment processes.
- Support business growth through greater customer engagement and long-term platform usage.

## **SMART Business Objectives**

The following objectives are Specific, Measurable, Achievable, Relevant, and Time-bound.

### **Objective 1 - Reduce Missed Recurring Payments**

Reduce missed recurring payments by **40%** within six months of product launch by enabling users to automate scheduled payments and receive proactive payment reminders.

### **Objective 2 - Increase Recurring Payment Adoption**

Increase the number of users actively utilizing recurring payment schedules by **35%** within the first twelve months after launch.

### **Objective 3 - Improve Payment Success Rate**

Maintain a recurring payment success rate of at least **98%** through reliable payment processing, validation, and user notifications.

### **Objective 4 - Improve Customer Satisfaction**

Achieve a Customer Satisfaction Score (CSAT) of **4.5 out of 5** within the first year by providing a seamless, transparent, and user-friendly payment experience.

### **Objective 5 - Reduce Payment-Related Support Requests**

Reduce customer support requests relating to missed, forgotten, or delayed recurring payments by **25%** within twelve months.

### **Objective 6 - Increase Monthly Active Users**

Increase Monthly Active Users (MAU) engaging with recurring payment features by **20%** within the first year of launch.

### **Objective 7 - Improve Customer Retention**

Increase customer retention by **15%** by encouraging long-term engagement through automated recurring payment services.

## **Expected Business Benefits**

The successful implementation of MoFlow is expected to generate measurable benefits for all key stakeholder groups.

### **Benefits for Individual Users**

- Reduced risk of missed payment deadlines.

- Improved financial planning and organization.
- Lower exposure to late payment penalties.
- Greater convenience through payment automation.
- Increased visibility into recurring financial commitments.
- Reduced time spent managing routine payments.

## Benefits for Small Businesses

- Improved cash flow management.
- Reduced administrative effort associated with recurring operational payments.
- Greater payment reliability.
- Improved forecasting of recurring business expenses.

## Benefits for Service Providers

- Increased on-time payments.
- Higher recurring transaction volumes.
- Reduced payment default rates.
- Lower operational costs associated with payment reminders and collections.
- Improved customer satisfaction and loyalty.

## Benefits for the Business

- Increased platform usage.
- Improved customer retention.
- Sustainable revenue growth through recurring transaction activity.
- Reduced customer support costs.
- Enhanced competitive positioning within the digital payments market.
- Stronger customer engagement through value-added financial services.

## Objective Traceability Matrix

The following matrix demonstrates how each business objective supports the overall business strategy and how success will be measured.

| Business Objective               | Business Value              | Success Metric      |
|----------------------------------|-----------------------------|---------------------|
| Reduce missed recurring payments | Improve payment reliability | Missed Payment Rate |

|                                     |                                   |                                              |
|-------------------------------------|-----------------------------------|----------------------------------------------|
| Increase recurring payment adoption | Increase platform engagement      | Number of Active Recurring Payment Schedules |
| Improve payment success rate        | Increase customer trust           | Successful Payment Rate                      |
| Improve customer satisfaction       | Enhance user experience           | Customer Satisfaction Score (CSAT)           |
| Reduce support requests             | Improve operational efficiency    | Number of Payment-Related Support Tickets    |
| Increase monthly active users       | Increase customer engagement      | Monthly Active Users (MAU)                   |
| Improve customer retention          | Support long-term business growth | Customer Retention Rate                      |

## Alignment with Business Strategy

The objectives defined for MoFlow support broader organizational goals focused on digital transformation, operational efficiency, customer experience, and sustainable business growth.

Specifically, the project aligns with the following strategic priorities:

- Increase adoption of digital financial services.
- Improve customer experience through automation.
- Strengthen customer loyalty and long-term engagement.
- Reduce operational costs associated with manual payment processes.
- Increase recurring transaction volumes to support sustainable revenue growth.
- Enhance the organization's competitive advantage within the digital payments ecosystem.

By aligning product objectives with measurable business outcomes, MoFlow ensures that future product decisions remain focused on delivering value to both users and the business.

## Risks to Achieving Business Objectives

The successful delivery of these objectives may be influenced by several factors, including:

- Low user adoption of recurring payment functionality.
- Integration challenges with payment service providers.
- Regulatory or compliance changes affecting digital payments.
- User concerns regarding payment security and privacy.
- Technical failures affecting payment processing reliability.

These risks will be monitored throughout the product lifecycle and addressed through appropriate mitigation strategies during project planning and implementation.

## **Conclusion**

The business objectives defined in this document establish a clear direction for the MoFlow project by translating business needs into measurable outcomes. They provide a framework for evaluating product success, prioritizing requirements, and ensuring that every feature developed contributes directly to the overall business strategy.

As the project progresses into requirements elicitation, process modelling, solution design, and Agile delivery, these objectives will serve as the primary reference point for decision-making and stakeholder alignment. Maintaining traceability between business objectives, requirements, and solution outcomes will help ensure that MoFlow delivers meaningful value to users, service providers, and the business.
