

Business Requirements Document (BRD)

Project: MoFlow: Smart Recurring Bill Payments Platform

Role: Business Analyst

Version: 1.0

Date: July 2026

Purpose

This document defines the high-level business requirements for MoFlow, a mobile-first platform that enables users to automate recurring mobile money payments.

Business Problem

Users manually manage recurring bills, leading to missed due dates, penalties, service interruptions and poor visibility into payment obligations.

Business Objectives

- Reduce missed payments
- Increase recurring payment adoption
- Improve customer satisfaction
- Provide centralized payment management
- Reduce payment-related support requests

Scope

In Scope: user registration, login, mobile money linking, recurring payment scheduling, reminders, dashboard, payment history.

Out of Scope: investments, loans, payroll, cryptocurrency, international payments.

Stakeholders

Executive Sponsor, Product Manager, Business Analyst, Engineering Team, UX/UI Designer, QA Engineer, Customer Support, Payment Service Providers, End Users.

Business Requirements

BR-001 Users shall register and authenticate securely.

BR-002 Users shall link a mobile money account.

BR-003 Users shall create recurring payment schedules.

BR-004 Users shall edit, pause and cancel schedules.

BR-005 Users shall receive payment reminders.

BR-006 The system shall process scheduled payments automatically.

BR-007 Users shall view payment history.

BR-008 Users shall receive payment confirmations.

BR-009 Users shall manage profile and notification preferences.

BR-010 Administrators shall monitor recurring payment activity.

Assumptions

Users have active mobile money accounts and internet access. Payment provider APIs are available.

Constraints

The project follows an MVP approach with a limited budget and delivery timeline.

Success Metrics

98% payment success rate, reduced missed payments, increased recurring transactions, CSAT above 4.5/5.

Approval

This BRD serves as a portfolio case study demonstrating Business Analysis documentation practices.
