

Business Rules Document

Project: MoFlow: Smart Recurring Bill Payments Platform

Document Type: Business Rules Catalog

Role: Business Analyst

Version: 1.0

Date: July 2026

1. Introduction

1.1 Purpose

This document defines the business rules governing the operation of the MoFlow Smart Recurring Bill Payments Platform. These rules ensure that recurring payment processes are consistent, compliant, secure, and aligned with business objectives.

Business rules define policies, constraints, and decision logic that guide how the system behaves. They are independent of technical implementation and provide a common understanding for business stakeholders, developers, testers, and product managers.

1.2 Scope

These business rules apply to:

- User registration
- Mobile money account management
- Recurring payment scheduling
- Payment processing
- Notifications
- User account management
- Administrative operations

2. Business Rules

User Registration & Authentication

BR-001 User Registration

Every user must register before accessing MoFlow services.

Priority: High

BR-002 Unique Account

A mobile number may only be associated with one active MoFlow account.

Priority: High

BR-003 Identity Verification

Users must complete identity verification before creating recurring payment schedules.

Priority: High

BR-004 Authentication

Only authenticated users may access payment management features.

Priority: High

BR-005 Account Suspension

Suspended users shall not be permitted to schedule or modify recurring payments.

Priority: High

Mobile Money Accounts

BR-006 Linked Account Requirement

Users must link at least one verified mobile money account before scheduling payments.

Priority: High

BR-007 Account Ownership

Users may only link mobile money accounts that belong to them.

Priority: High

BR-008 Active Account

Recurring payments shall only use active linked accounts.

Priority: High

Recurring Payments

BR-009 Minimum Required Information

Every recurring payment schedule must include:

- Biller
- Payment amount
- Payment frequency
- Start date
- Payment account

Priority: High

BR-010 Future Start Date

Recurring payments cannot start on a date in the past.

Priority: High

BR-011 Payment Frequency

Only the following frequencies are permitted:

- Daily

- Weekly
- Monthly
- Quarterly
- Annually

Priority: High

BR-012 Active Schedule

Users may only modify active recurring payment schedules.

Priority: Medium

BR-013 Duplicate Schedules

The system shall prevent duplicate recurring payment schedules for the same biller, amount, frequency, and start date unless explicitly confirmed by the user.

Priority: Medium

BR-014 Schedule Cancellation

Cancelled recurring payment schedules cannot be reactivated.

Priority: Medium

BR-015 Pause Schedule

Paused schedules shall not process payments until resumed.

Priority: High

Payment Processing

BR-016 Payment Validation

The system shall validate payment details before initiating payment.

Priority: High

BR-017 Available Balance

Payments shall only be processed if sufficient funds are available.

Priority: High

BR-018 One Execution Per Cycle

A recurring payment shall not be executed more than once during the same billing cycle.

Priority: High

BR-019 Failed Payments

Failed payments shall not be marked as successful.

Priority: High

BR-020 Payment Confirmation

Users shall receive confirmation after every successful payment.

Priority: High

BR-021 Failed Payment Notification

Users shall receive notifications when scheduled payments fail.

Priority: High

BR-022 Payment History

Every processed payment shall be recorded in payment history.

Priority: High

Notifications

BR-023 Reminder Timing

Users shall receive reminders before scheduled payments based on configured preferences.

Priority: Medium

BR-024 Notification Preferences

Users may configure notification channels and reminder timing.

Priority: Medium

BR-025 Notification Delivery

Notifications shall only be sent to verified contact details.

Priority: High

User Profile

BR-026 Profile Updates

Users may update profile information except their unique account identifier.

Priority: Medium

BR-027 Password Changes

Users must authenticate before changing passwords.

Priority: High

Administration

BR-028 User Management

Only administrators may suspend or deactivate user accounts.

Priority: High

BR-029 Audit Logs

Administrative actions shall be recorded in audit logs.

Priority: High

BR-030 Reporting

Administrative reports shall only include authorized business data.

Priority: Medium

Security

BR-031 Session Expiry

Inactive sessions shall expire automatically after the configured timeout period.

Priority: High

BR-032 Access Control

Users shall only access information and functions appropriate to their assigned role.

Priority: High

BR-033 Data Protection

Sensitive customer information shall not be exposed to unauthorized users.

Priority: High

Compliance

BR-034 Regulatory Compliance

Payment processing shall comply with applicable financial regulations.

Priority: High

BR-035 Data Privacy

Personal information shall be processed in accordance with applicable data protection laws.

Priority: High

Business Operations

BR-036 Payment Status

Each payment shall have only one current status:

- Pending
- Processing
- Successful
- Failed
- Cancelled

Priority: High

BR-037 Payment Receipts

Every successful payment shall generate a receipt accessible to the user.

Priority: Medium

BR-038 Dashboard Accuracy

Dashboard information shall reflect the latest payment and schedule data.

Priority: High

BR-039 Historical Records

Completed payment records shall not be deleted by users.

Priority: High

BR-040 System Availability

Scheduled payments shall continue processing during normal operating conditions without requiring manual user intervention.

Priority: High

3. Business Rule Categories

Category	Number of Rules
User Registration & Authentication	5
Mobile Money Accounts	3
Recurring Payments	7
Payment Processing	7
Notifications	3
User Profile	2
Administration	3
Security	3
Compliance	2
Business Operations	5
Total	40

4. Relationship to Other Project Documents

This Business Rules Catalog supports and complements the following project artifacts:

- Business Requirements Document (BRD)
- Functional Requirements Specification (FRS)
- Non-Functional Requirements Specification (NFRS)
- User Stories
- Acceptance Criteria
- Requirements Traceability Matrix (RTM)
- Test Cases
- Jira Product Backlog

Each business rule should be referenced during requirements analysis, sprint planning, solution design, and quality assurance to ensure that business policies are consistently implemented and validated.

5. Assumptions

- Users possess valid mobile money accounts.
- Payment providers support secure API integrations.
- Users consent to receive payment notifications.
- Regulatory requirements remain applicable throughout the product lifecycle.

6. Constraints

- Payment execution depends on third-party mobile money provider availability.
- Daily transaction limits imposed by payment providers may affect processing.
- Compliance requirements may change over time.
- Business rules may evolve based on stakeholder feedback and regulatory updates.

7. Conclusion

The Business Rules Catalog establishes the operational policies and decision logic that govern the MoFlow platform. These rules ensure consistent business operations, support

regulatory compliance, and provide a clear reference for developers, testers, product managers, and stakeholders. By documenting these rules independently of technical implementation, the project promotes traceability, maintainability, and alignment between business objectives and system behaviour.
