

Product Backlog

Project: MoFlow:Smart Recurring Bill Payments Platform
Document Type: Product Backlog
Role: Business Analyst
Methodology: Agile Scrum
Version: 1.0
Date: July 2026

1. Introduction

1.1 Purpose

This Product Backlog defines the complete list of features, enhancements, and technical work required to deliver the MoFlow Smart Recurring Bill Payments Platform. The backlog serves as the single source of work for the Scrum team and is continuously refined throughout the product lifecycle.

Items are prioritised based on business value, customer needs, technical dependencies, and release objectives. The backlog supports sprint planning, release planning, and product roadmap execution.

2. Product Goal

Develop a secure, mobile-first platform that enables users to automate recurring bill payments through Mobile Money, reducing missed payments while improving financial convenience and user engagement.

3. Backlog Prioritisation Scale

Priority	Description
Highest	Critical for MVP release

High	Important for initial production release
Medium	Planned after MVP
Low	Future enhancement

4. Product Backlog

Backlog ID	User Story	Epic	Priority	Story Points	Sprint	Status
US-001	Register a New Account	User Management	Highest	5	Sprint 1	Done
US-002	User Login	Authentication & Security	Highest	3	Sprint 1	In Review
US-003	Reset Password	Authentication & Security	High	5	Sprint 1	In Progress
US-004	Manage User Profile	User Management	Medium	3	Sprint 1	In Review
US-005	Link Mobile Money Account	Bill & Biller Management	Highest	8	Sprint 1	To Do
US-006	Manage Linked Mobile Money Accounts	Bill & Biller Management	Medium	5	Product Backlog	To Do
US-007	Create Recurring Payment	Recurring Payments	Highest	8	Sprint 1	To Do
US-008	Select Payment Frequency	Recurring Payments	High	3	Sprint 1	To Do
US-009	Edit Payment Schedule	Recurring Payments	High	5	Sprint 2	To Do
US-010	Pause Payment Schedule	Recurring Payments	Medium	3	Sprint 2	To Do
US-011	Resume Payment Schedule	Recurring Payments	Medium	3	Sprint 2	To Do

US-012	Cancel Payment Schedule	Recurring Payments	High	3	Sprint 2	To Do
US-013	Automatic Payment Execution	Recurring Payments	Highest	8	Sprint 2	To Do
US-014	Payment Confirmation	Notifications & Reminders	High	3	Sprint 2	To Do
US-015	Failed Payment Notification	Notifications & Reminders	High	3	Sprint 2	To Do
US-016	Retry Failed Payment	Notifications & Reminders	Medium	5	Sprint 3	To Do
US-017	Dashboard Overview	Dashboard & Reporting	Highest	8	Sprint 2	To Do
US-018	Upcoming Payments	Dashboard & Reporting	High	5	Sprint 2	To Do
US-019	Payment History	Dashboard & Reporting	High	5	Sprint 3	To Do
US-020	Search Payment History	Dashboard & Reporting	Medium	5	Sprint 3	To Do
US-021	Filter Transactions	Dashboard & Reporting	Medium	5	Sprint 3	To Do
US-022	Download Receipts	Dashboard & Reporting	Medium	3	Sprint 3	To Do
US-023	Payment Reminder Notifications	Notifications & Reminders	High	5	Sprint 2	To Do
US-024	Notification Preferences	Settings & Preferences	Medium	3	Sprint 3	To Do
US-025	Secure Authentication	Authentication & Security	Highest	5	Sprint 2	To Do
US-026	Multi-Factor Authentication	Authentication & Security	Medium	8	Sprint 4	To Do
US-027	Automatic Logout	Authentication & Security	Medium	3	Sprint 4	To Do
US-028	User Management	Administration	High	8	Sprint 4	To Do

US-029	Monitor Transactions	Administration	High	8	Sprint 4	To Do
US-030	Generate Reports	Administration	Medium	5	Sprint 4	To Do
US-031	Spending Insights	Dashboard & Reporting	Low	8	Future Release	To Do
US-032	Budget Monitoring	Dashboard & Reporting	Low	8	Future Release	To Do
US-033	Multiple Payment Categories	Settings & Preferences	Medium	5	Future Release	To Do
US-034	Favourite Billers	Bill & Biller Management	Medium	5	Future Release	To Do
US-035	Payment Calendar	Dashboard & Reporting	Medium	5	Future Release	To Do

5. Backlog Summary by Epic

Epic	Stories	Priority
User Management	2	Highest
Authentication & Security	5	Highest
Bill & Biller Management	2	Highest
Recurring Payments	6	Highest
Notifications & Reminders	4	High
Dashboard & Reporting	8	High
Settings & Preferences	2	Medium
Administration	3	High

Total Backlog Items: 35 User Stories

6. MVP Scope (Release 1.0)

The Minimum Viable Product (MVP) includes the following capabilities:

- User registration and authentication
- Password recovery
- Mobile Money account linking
- Recurring payment creation and management
- Automatic payment execution
- Dashboard overview
- Payment reminders
- Payment history
- Basic administration
- Secure authentication

7. Product Backlog Refinement Guidelines

The Product Backlog will be reviewed regularly to ensure it remains aligned with business priorities.

Refinement activities include:

- Reviewing user feedback
- Clarifying requirements
- Splitting large stories
- Re-estimating story points
- Reprioritising backlog items
- Identifying new dependencies
- Removing obsolete stories

Backlog refinement sessions will be conducted before each sprint planning meeting.

8. Definition of Ready (DoR)

A backlog item is ready for sprint planning when:

- Business value is clearly defined.
- User story follows the standard Agile format.
- Acceptance criteria are complete.

- Dependencies are identified.
- Story has been estimated.
- Product Owner has approved the story.

9. Conclusion

The MoFlow Product Backlog provides a structured, prioritised view of all planned work required to deliver the Smart Recurring Bill Payments Platform. Organised by epics and aligned with Agile Scrum practices, it supports incremental delivery through multiple sprints while ensuring that the highest-value functionality is delivered first. The backlog will continue to evolve through ongoing refinement as stakeholder feedback, business priorities, and product requirements change.
